MEMO FOR: 

SUBJECT : USIB Meeting on KIQs

1. On Thursday I represented you at the USIB discussion of the KIQ package. As it turned out, there was no discussion of specific KIQs. The general discussion around the table indicated some problems with format, problems with implementation of collection tasking, and some concern at the fact that the principals were confronted with all the KIQs at the same time. Contrary to the earlier understanding between Carver and Colby, the Director agreed to hold individual USIB sessions of approximately one hour each on each group of KIQs. Carver indicated at the Thursday NIO meeting that he was going to discuss this further with Colby.

2. As you can see from the attached document, the IC Staff once again took off on their own and prepared a paper for the USIB regarding the KIQs, without clearing it with the NIOs. George is naturally upset about this.
